

# MUDBONE

## Technical Rider & Stage Plot

This rider covers Mudbone's full “up to 9-piece” band configuration. Mudbone performs in flexible formats — from solo acoustic to the full band shown below — and the requirements scale down accordingly for smaller bookings. Confirmed configuration will be communicated in advance of the show.

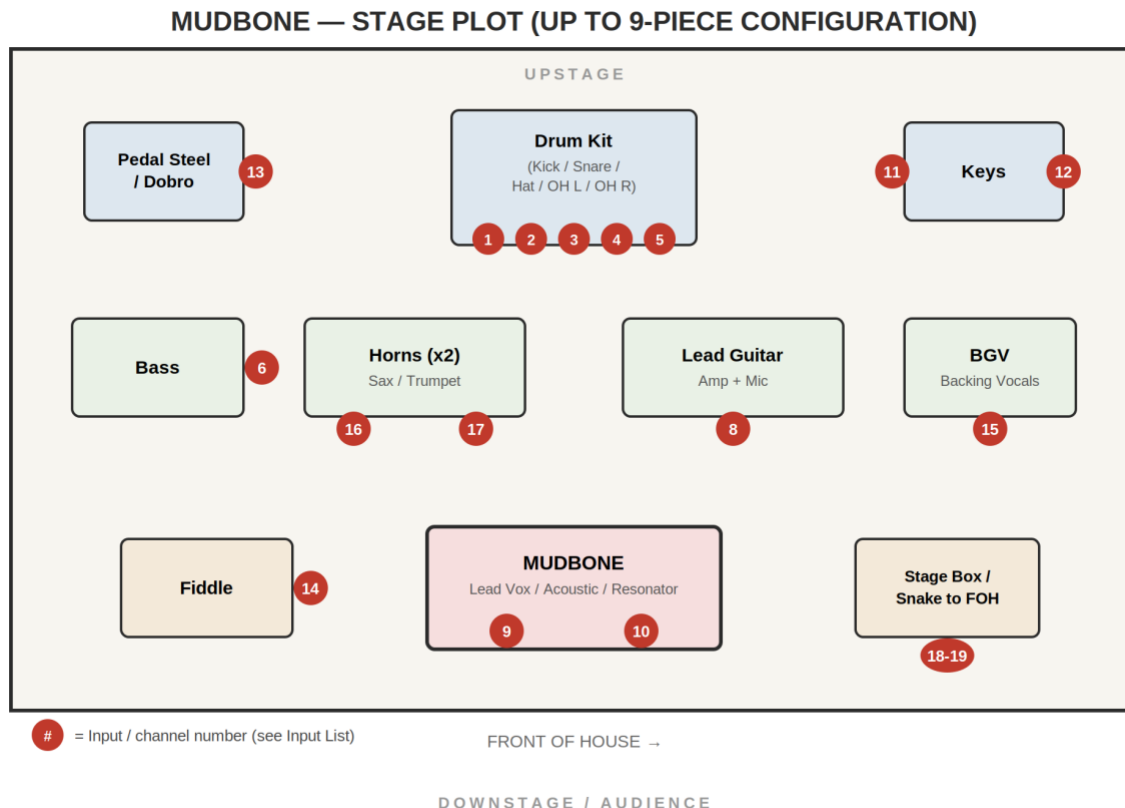

## Contact

Artist / Band Leader: Mudbone

Booking Contact: [Name / Phone / Email]

Tour Manager / FOH (if applicable): [Name / Phone / Email]

## Stage Plot — Up to 9-Piece Configuration

Configurations smaller than the full 9-piece (duo, trio, 4–6 piece, etc.) use a subset of the positions and inputs shown above — typically Mudbone (vocal/acoustic), bass, drums, and lead guitar as the core, adding keys, pedal steel, fiddle, horns, and backing vocals as the booking size increases.

## Input List

| Ch. | Source | Mic / DI / Notes |
|-----|--------|------------------|
|-----|--------|------------------|

|    |                                       |                                               |
|----|---------------------------------------|-----------------------------------------------|
| 1  | <b>Kick Drum</b>                      | Beta 91 / D6 or equivalent                    |
| 2  | <b>Snare</b>                          | SM57 or equivalent                            |
| 3  | <b>Hi-Hat</b>                         | Small condenser                               |
| 4  | <b>Overhead L</b>                     | Condenser pair                                |
| 5  | <b>Overhead R</b>                     | Condenser pair                                |
| 6  | <b>Bass</b>                           | DI (active, artist-supplied)                  |
| 7  | <b>Spare / Bass Amp Mic</b>           | If miking cab instead of DI                   |
| 8  | <b>Lead Guitar</b>                    | Amp mic (SM57 or equivalent)                  |
| 9  | <b>Mudbone — Acoustic / Resonator</b> | DI (artist-supplied)                          |
| 10 | <b>Mudbone — Lead Vocal</b>           | Artist-supplied mic, needs XLR from stage box |
| 11 | <b>Keys L</b>                         | DI                                            |
| 12 | <b>Keys R</b>                         | DI                                            |
| 13 | <b>Pedal Steel / Dobro</b>            | DI (artist-supplied)                          |
| 14 | <b>Fiddle</b>                         | DI or clip-on mic                             |
| 15 | <b>Backing Vocal</b>                  | Vocal mic on boom stand                       |
| 16 | <b>Horn 1 (Sax)</b>                   | Clip-on or condenser                          |
| 17 | <b>Horn 2 (Trumpet)</b>               | Clip-on or condenser                          |
| 18 | <b>Spare</b>                          | —                                             |
| 19 | <b>Spare</b>                          | —                                             |

## Sound

---

- House PA system sized appropriately for room/venue capacity, with subs for full-band configurations.
- Monitor wedges per stage position shown (minimum 4 mixes for full band; fewer for smaller configurations).
- Qualified house sound engineer for load-in, soundcheck, and the performance.
- Stage snake / multicore to FOH with the channel count shown in the Input List (19 channels for full band; reduced for smaller lineups).
- Mudbone provides own guitars, acoustic/resonator, DI boxes, and vocal mic. House provides drum mics, amp mics, backline mics, and DIs for bass/keys/pedal steel as listed.

## Lighting

---

- Basic stage wash sufficient for the performance area; no special programming required.
- If house has a lighting operator and additional capability (color washes, follow spot), it's welcome but not required.

## Power

---

- Minimum two (2) dedicated 20A circuits at the stage, located within reach of backline and amps.
- One (1) additional 20A circuit at FOH/mix position if not already provided by house system.

## **Backline / Stage**

---

- Mudbone is self-contained and travels with guitars, amps, and personal gear for all configurations.
- House-provided backline needed only for larger configurations: full drum kit (with hardware and throne), bass amp, and keyboard amp/DI for the keys position.
- Stage size: minimum 16' x 12' for solo/duo; minimum 24' x 16' recommended for the full 9-piece configuration shown above.
- Risers for drums (if available) are appreciated for larger rooms but not required.

## **Hospitality**

---

- Bottled water for all performers (1 case minimum for full band).
- Green room / dressing room space with seating, mirror, and access to restroom.
- Local meal or meal buyout for performers on show days — details to be confirmed per booking.

## **Notes**

---

This rider is intended as a starting point and can be adjusted per venue and configuration. For questions on any item above, please contact the booking representative listed at the top of this document.
